

Our

GRATEMESH

Simplifies everyday life!

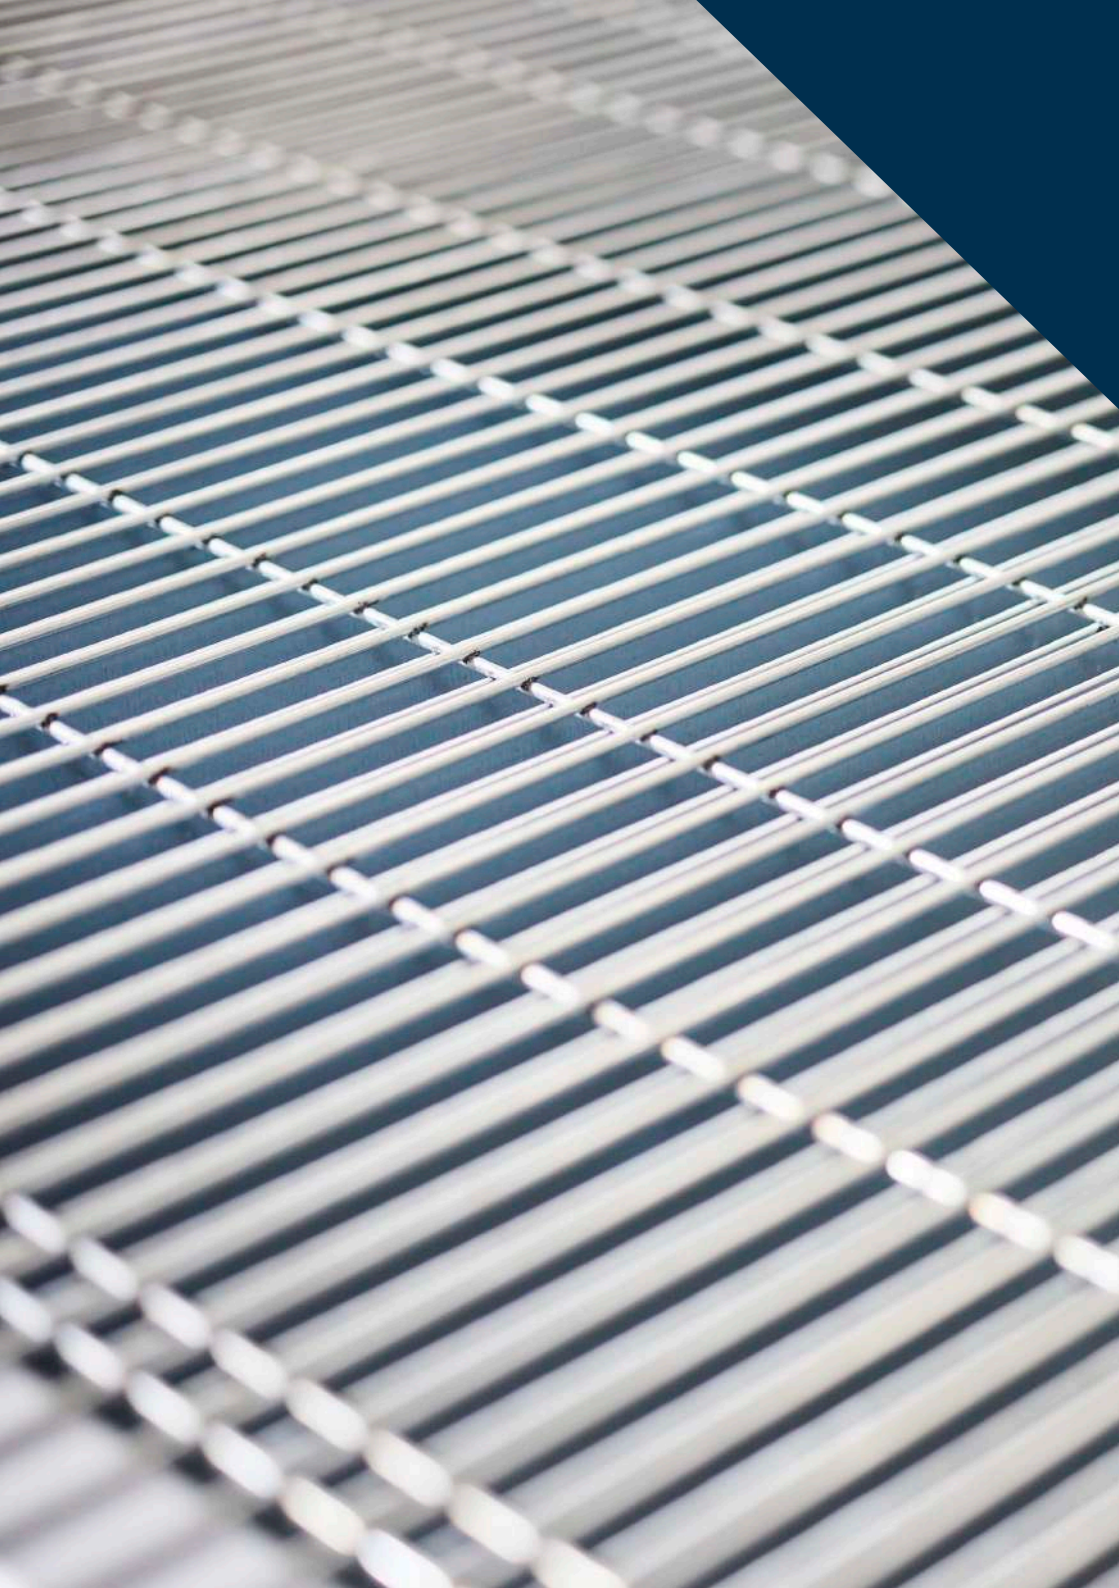

OUR LATEST MESH DECKS,
playfully referred to as the
GRATEMESH, REPRESENT THE
ULTIMATE FUSION OF A MESH DECK
AND TRADITIONAL GRATING. *It's*
like getting the best of both
worlds!

With its innovative design, the GrateMesh offers the strength typical of traditional gratings while being surprisingly budget-friendly in comparison.

NEED AN AFFORDABLE SOLUTION FOR STORING POINT LOADS?

GrateMesh offers an affordable alternative to traditional gratings, without compromising on strength or durability.

With our online design tool, the Garantellator, under the heading mesh decks, you can quickly and easily calculate your loading scenario and determine the ideal configuration for your project.

NEED A STRONG DECKING?

GrateMesh is engineered to handle heavy loads, making it the ideal solution for industrial and commercial applications.

The max load for a common size of 900 mm width / 1100 mm depth is, for instance, 3283kg/m².

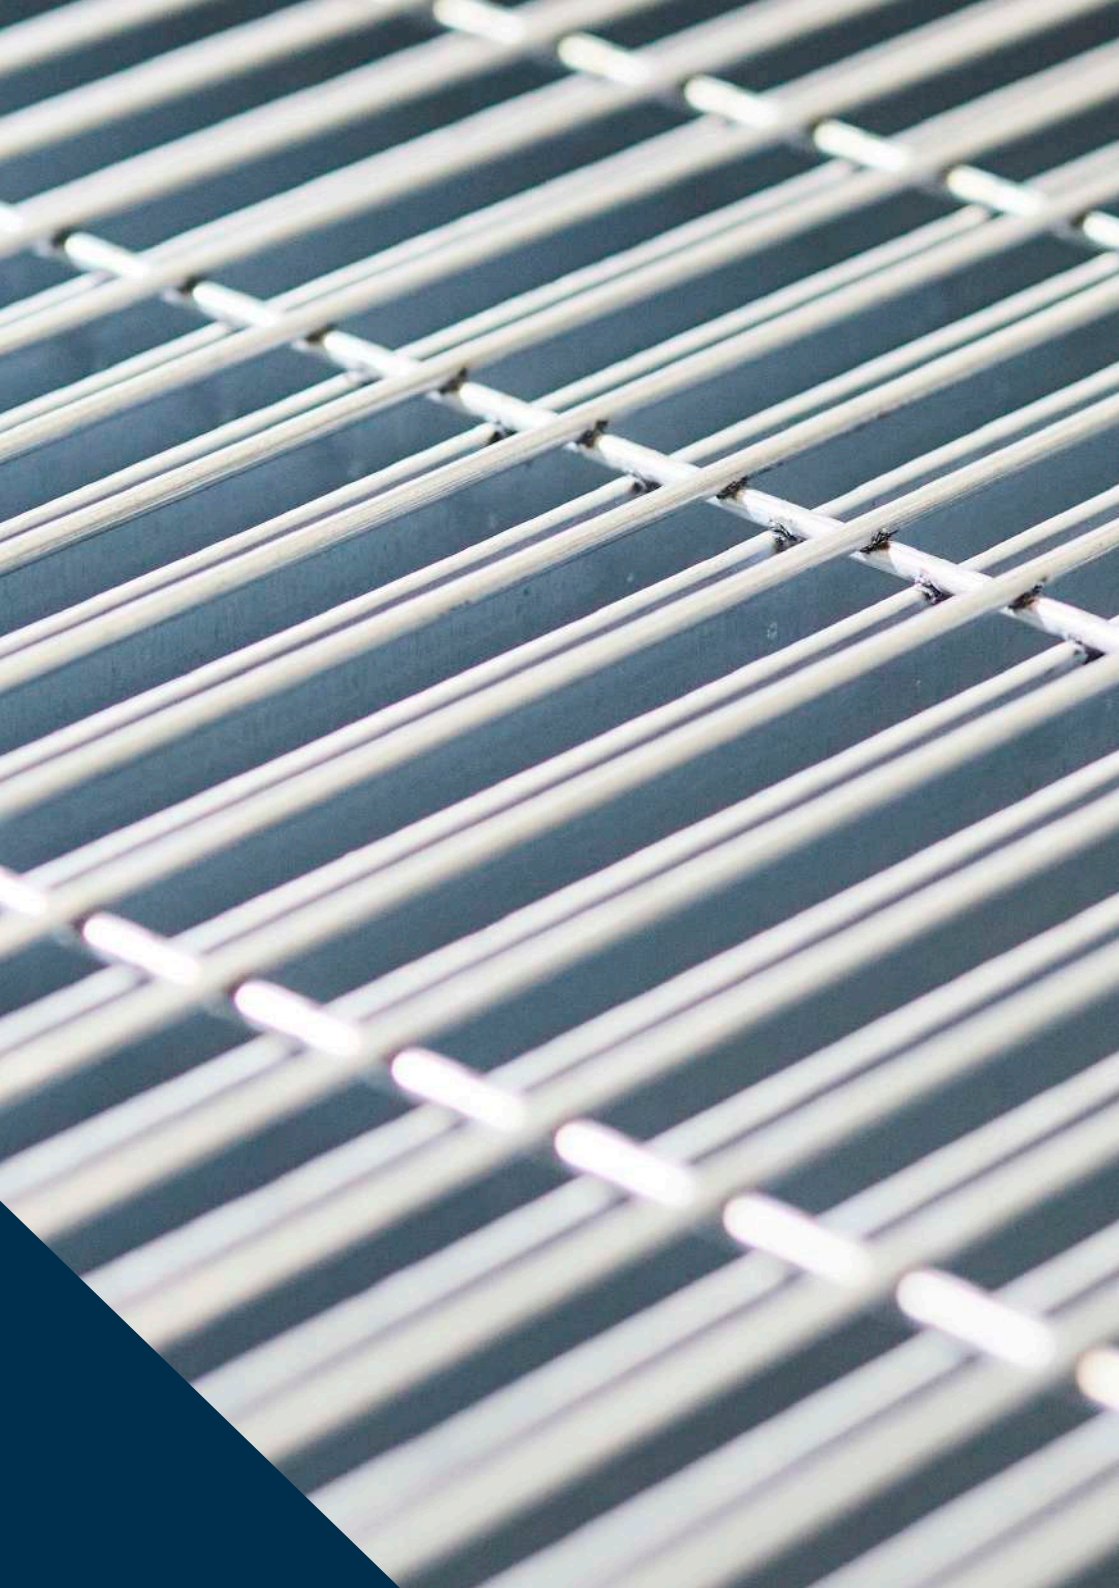

NEED A VERSATILE SOLUTION?

GrateMesh is suitable for a variety of applications, including use with Euro mesh boxes with single feet.

The program can calculate load scenarios with a pallet foot size as low as 25 mm. Its open design allows for easy cleaning and maintenance, while its flexibility allows for customization to meet the exact needs of your project.

NEED TO BE SURE THE GRATEMESH WILL HOLD THE LOADING?

*The strength is calculated according to
ANSI MH26.2-2017,*

so the safety factor is at least 2.0. Our online configurator allows you to combine different loading scenarios. **It will also tell you when it is not possible to design a GrateMesh.**

NEED A FAST DELIVERY?

As our online design tool is directly connected to our production, you can see delivery in real time.

And no worries, we are known for our fast delivery times!

*Simplify
everyday life!*
